Code review form for FIT1008 and FIT2085 – Week10

1. **Prac day & time *: Friday 10 AM – 1 PM**

2. **Your name: Vanessa**

3. **Put the name of each student in your group in a column, and give a mark (Not really, Some times, Mostly Yes) to the criteria in each row (add extra criteria if appropriate)**

	Lai Ying Ying	Wong Yi Xiong	Tan Sook Mun
Comments are accurate and informative	S	Y	S
Consistent & meaningful variable names	Y	Y	Y
Code functionality is almost complete	Y	Y	Y
Code performs the intended function	Y	Y	Y
Redundant or unnecessarily repeated code is not used	Y	Y	Y
Structure is clean & indentations correct	Y	Y	Y
Code is as simple as it can be	Y	Y	Y
The student's comments helped you identify issues with your code	S	S	S

4. **What are the most common/important mistakes of the code produced by those in the group?**

   One of the mistakes we had was that some of us had insufficient comments. Some docstrings are incomplete (no pre-condition, post-condition, description). This made it harder to read and understand the code.

5. **What have you learnt about your code from your group? What changes you would now do?**

   One of their codes, they broke the problem down into smaller subproblems and created different functions to solve these subproblems. This makes for a neater and easier to understand code. I should practice this next time and not lump everything into one function only.
